IS 2000 – Recruitment website

Team name:

Team members:
- Jared Smith
- Brock Wallace
- Prince Nash
- Kay Jilesen

Audience:
Potential SUU CS/IS students, high school (senior/junior) students.

Description:
Informational website
Learning goals, preparation, prerequisites, majors it would apply to, contact information, languages and programs.

Goals:
To inform people about and make people pick the IS 2000 class.

Gather information:
Canvas (Syllabus, assignments etc.)
Professors
SUU website (Class descriptions)
Web development documentation online

Design:
Cool, colorful, flashy and interactive to make it attractive for the young target audience.

Timeline:

1 – 2 Week

To set coding / design standards and bring all the ideas together at the beginning. Set the basics and start with the whole group together.
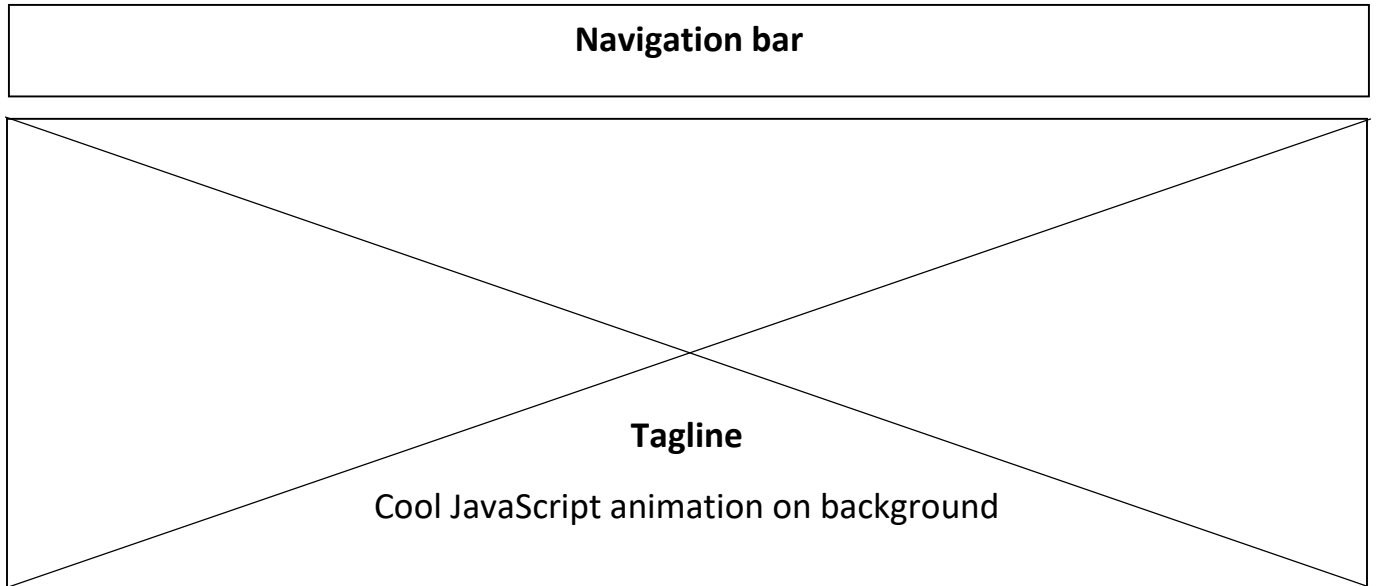

3 – 4 Week

Initializing the projects in small (to-do) components. Working with groups of 2 to learn from each other and work on the components. At the end of this weeks all the information is already on the website.
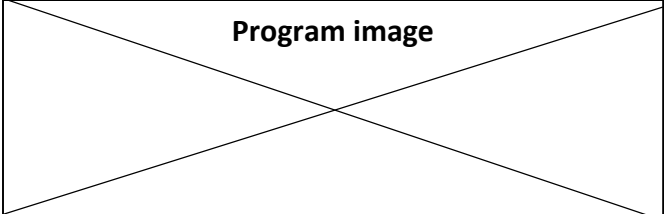

5 – 6 Week

Adding the 'cool' stuff to make it more than just information. Clean it up, documentate and learn from each other.
